PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with experience designing and building responsive, accessible web applications using React, TypeScript, and Tailwind CSS. Strong foundation in component-based architecture, UI/UX design principles, and modern frontend engineering practices, backed by full-stack fluency across Node.js, Express, and MongoDB. Passionate about crafting intentional, polished user experiences and leveraging AI-assisted development tools to accelerate problem-solving and code quality. Known for taking ownership of projects, learning quickly, and turning complex ideas into working products.

TECHNICAL SKILLS

Languages | JavaScript, TypeScript, Python

Frontend | React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Component-Based Architecture

Backend | Node.js, Express, MongoDB, RESTful APIs, Authentication

Tools | Git, GitHub, GitHub Copilot, Claude Code, Cursor, ChatGPT, VS Code, Postman, Figma

Concepts | UX Principles, Design Systems, Full Stack Development, Async Programming, Agile Development, SDLC, AI-Assisted Development

PROJECTS

[The Arcane Script](#) | AI-Powered Fantasy Typing RPG

- Developing a full-stack web application combining fantasy RPG mechanics with interactive typing-based gameplay, scoped and built independently end-to-end.
- Architecting responsive frontend interfaces using React, TypeScript, reusable component design, and modern state management patterns.
- Designing and implementing RESTful APIs, user authentication, and persistent player progression systems.
- Integrating AI-driven gameplay interactions to create dynamic encounters and personalized user experiences.

[FuelWise](#) | Athlete Recovery & Training Insights Platform

- Collaborated with a development team to build a responsive web application focused on athlete recovery and training insights.
- Created low-fidelity and high-fidelity wireframes and interactive prototypes in Figma for desktop and mobile experiences.
- Developed reusable frontend components using React and TypeScript while following responsive design principles.
- Helped translate complex recovery and performance data into intuitive user workflows and actionable insights.

EDUCATION AND TECHNICAL DEVELOPMENT

Per Scholas | Atlanta, Ga

Full Stack Software Development | 02/2026 - 07/2026

Scrimba | Remote

The Full Stack Path | 06/2025 - 04/2026

Coursera | Remote

Python for Everyone | 10/2024 - 08/2025

Coursera | Remote

Google UX Design | 07/2022 - 03/2023

North Carolina Agricultural & Technical State University | Greensboro, NC

Applied Engineering and Technology | 2015 – 2016

(Coursework completed — degree not conferred)

PROFESSIONAL EXPERIENCE

[CanServU Inc.](#) | **Nonprofit Website for Cancer Support Community**

Volunteer Full Stack Developer

- Designed, developed, and deployed Version 1 of a responsive nonprofit website to support community outreach, volunteer engagement, and organizational awareness.
- Prototyped page layouts and user flows in Figma, then built the functioning site in React and Tailwind CSS, translating designs into a working donation flow with tiered giving amounts, a one-time/monthly toggle, and real-time impact messaging tied to donation size.
- Continue maintaining and enhancing the platform with planned backend integrations, including a secure Stripe-powered donation system and future feature improvements.
- Partnering directly with a non-technical nonprofit team to scope features and prioritize work within limited time and resources.

Amazon Logistics | Atlanta, Ga

DSP Delivery Driver | 10/2023 - Present

- Utilize route optimization software and mobile delivery applications to manage 150+ daily deliveries, maintaining consistent on-time performance across high-volume routes
- Apply real-time data analysis and adaptive decision-making to resolve route disruptions, reducing delays and improving operational efficiency
- Leverage GPS-based tracking systems and digital dispatch tools to coordinate time-sensitive logistics across a multi-stop delivery network

DHL Supply Chain | Fairburn, Ga

Forklift Operator, Inventory Specialist | 11/2022 - 05/2023

- Operated Warehouse Management Systems (WMS) to maintain real-time inventory accuracy, update stock levels, and resolve data discrepancies across daily operations

- Monitored and analyzed inventory data to generate accurate tracking reports, supporting data-driven decision-making for supply chain workflows
- Collaborated with cross-functional teams to streamline receiving and shipping processes, consistently meeting daily throughput targets

Southeast Consolidators | Ellenwood, Ga

Forklift Operator, Team Lead | 09/2021 - 09/2022

- Led onboarding and training for new team members, developing structured procedures that reinforced operational best practices
- Analyzed workflow inefficiencies and implemented process improvements, reducing recurring operational issues
- Oversaw daily inventory coordination and logistics operations, achieving 99% inventory accuracy across all warehouse activities
